

School Sort helps users identify post-secondary schools that match their academic and career goals, as well as their personal preferences.

From the AKCIS home page, hover over Education and select School Sort:

Read the directions and begin the **Undergraduate School Sort**.

1. As you go through the activity, select the criteria that are important to you. Click **Continue** to move through each topic.
2. You can click on **Get My Results** at any time to view a list of schools. Try narrowing your search to generate 40 or fewer undergraduate schools. If your search generated less than 5 schools, try broadening your search a bit.
3. **Note!** When selecting your desired **tuition** range, remember that those dollar amounts are the sticker prices, not necessarily what you would actually pay. *Some of the most expensive schools in terms of sticker price offer the most financial aid.*
4. Find out more details about the schools on your list by simply clicking on the school name.
5. Select your 3 favorite schools by checking the box next to the school name and click **Save Checked**.

School	Average Cost	Location	Program of Study	Can you receive the training you would need for your Occupations of interest at this school? Yes or No, why and what Occupation?
